

Gamsby and Mannerow invest in Deltek Vision® leveraging local implementation expertise

Toronto, Canada – March 31, 2009 – Kennedy Vomberg Inc is pleased to announce that Gamsby and Mannerow Limited has selected Deltek Vision as their next generation business management solution. The Gamsby and Mannerow management team and directors felt that the project-based enterprise-wide application, complemented by locally Vision-accredited consulting resources, was the best investment for the firm at this time. Overall, the selection team felt that Vision would provide a number of operational benefits including improved project profitability analysis, better staff utilization insight (including both billable and non-billable activity), and more efficient client receivables management.

“Gamsby and Mannerow is one of a long list of Wind2 FMS clients who have made the switch to Deltek Vision and Kennedy Vomberg,” said Don Kennedy, Principal of Kennedy Vomberg. “Deltek has recently announced a major new release of Vision, the culmination of over 170,000 hours of continual development investment. This along with award winning customer support, backed by a publicly-traded financially-viable corporation makes Vision a very sound investment for most professional services firms. Deltek’s significant attention on the Canadian marketplace, through the establishment of a local office and roll-out of Canadian user groups, is starting to pay dividends evidenced by the rapidly expanding customer base.”

About Kennedy Vomberg

Kennedy Vomberg is headquartered in Toronto and provides business advisory and software consulting services to the professional services industry throughout Ontario and beyond. In partnership with Deltek, Kennedy Vomberg markets and implements the Vision line of business management solutions to organizations that are project-based. For 2008, Kennedy Vomberg was recognized as Deltek’s Growth Partner of the Year globally.
