

Thompson Rosemount Group steps up to Deltek Vision® to Support Business Strategy

Toronto, Canada – June 30, 2008 – Kennedy Vomberg Inc is pleased to announce that The Thompson Rosemount Group Inc. has selected the Deltek Vision project-based business application. Senior leadership viewed this an opportune time for the business to invest in a solution that would support the re-engineering of some of Thompson Rosemount's overall business processes, expand the extent of management reporting, and automate additional key functional areas to drive further operational efficiencies across the business.

"As a multi-discipline engineering firm with several offices in Ontario, we feel that this investment will offer us a healthier insight into line of business metrics and profitability across the organization," said William (Bill) Knight, Vice President, Thompson Rosemount Group. "We also feel that the browser-based nature of the application will allow us to drive additional operational efficiencies, by supporting role-based access to information in an anytime/anywhere environment with a low cost of ownership."

"We're excited to be entering into this partnership with The Thompson Rosemount Group. A key outcome of this deployment should be improved responsibility and accountability through timely access to information on a role-based level, allowing project managers and individual contributors to be more effective in their roles," said Don Kennedy, Principal of Kennedy Vomberg. "At the same time, the solution will offer senior management better and more accurate information to make strategic decisions affecting the growth of the business."

About Kennedy Vomberg

Kennedy Vomberg is headquartered in Toronto and provides business advisory and software consulting services to the professional services industry throughout Ontario and beyond. In partnership with Deltek, Kennedy Vomberg markets and implements the Vision line of business management solutions to organizations that are project-based.

A sampling of Kennedy Vomberg clients include Aardvark Drilling, the Centre for Excellence in Mining Innovation, Compugen, Corporate Contracting, the Mining Innovation Rehabilitation and Applied Research Corporation, Montgomery Sisam Architects, NFOE Architects, NXL Architects, and Stendel + Reich Architects.

About The Thompson Rosemount Group

Headquartered in Cornwall, The Thompson Rosemount Group has office locations in Kingston, Ottawa, and Guelph with over eighty professional, technical and support staff, who provide client services in a full range of architecture and engineering practice areas including: municipal/transportation, environmental, industrial, institutional and health care. As the firm has capabilities in various engineering disciplines, Thompson Rosemount Group can offer an in-house transdisciplinary approach to projects and problem solving along with comprehensive project management.

Cultivated over the last half century, Thompson Rosemount Group's corporate culture strongly supports the notion that quality service can only be delivered with a full understanding of client needs. This culture appreciates that quality and cost must be balanced in terms of initial capital cost, sustainability, and respect for the environment.
